

MANAGING PROJECTS

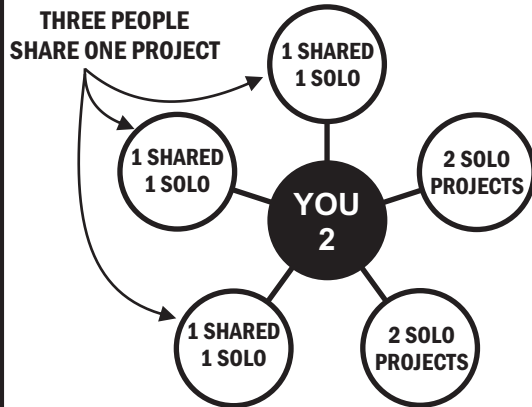

FULL CAPACITY WITH NO SHARED PROJECTS

- Every decision maker, including you, has the responsibility of two of their own projects.
- In this diagram, you can supervise, oversee, direct the projects of 5 other decision makers.
- This group's maximum amount of projects is 12. Each decision maker, including you, has 2 projects for a total of 12.

FULL CAPACITY WITH SHARED PROJECTS

- Three team members have the same shared project to manage. The reasons may include the size and complexity, resources, etc. Your strategizing concludes the need for multiple individuals.
- In this diagram YOU can supervise, oversee, direct the projects as in the FULL CAPACITY illustration.
- The group has 10 projects in progress. Two individuals have 2 projects, three have a shared project and a solo project, and you have 2 projects.
- There are many variations of the shared projects illustration.

EXTENDED CAPACITY with OUTSOURCING

- You can outsource as many projects as you feel you can allocate time to oversee. Leaders often forget that outsourcing requires reviews, meetings, negotiations, and tracking, to keep vendors on target or to integrate the vendor's and supplier's projects with your internal operations.
- This group's maximum amount of projects is unlimited. Each decision maker, including you, has 2 projects for a total of 12, however, you may have as many outsourced vendors as you can support or need.
